New Century Software Expands Integrity Management & Regulatory Compliance Professional Services

Services include Comprehensive Integrity Management Program (IMP) and Regulatory Compliance Support for Pipeline Companies

FORT COLLINS, Colo. (February 11, 2014) - New Century Software, Inc., a leading provider of GIS-based pipeline software and services, announced that it has expanded its capabilities to include comprehensive integrity management and pipeline compliance consulting services. The additional services provide New Century Software the ability to better serve clients through the incorporation of applied integrity management and compliance strategies into its software solutions.

“As we continually strive to improve, the addition of our expanded services and expertise demonstrates our commitment to our clients and positions New Century Software to continue its long-standing leadership role in the pipeline industry,” says Ron Brush, President of New Century Software.

Leading New Century Software’s consulting and services team is Mike LaMont, Vice President of Professional Services. Having served in both industry and consulting roles, LaMont specializes in regulatory compliance strategies and brings over 15 years of compliance and integrity management experience. Lamont’s experience and commitment to facilitating client success provide clients with the expertise and leadership necessary to achieve their unique goals and objectives.

“As the pipeline industry attempts to manage unprecedented growth, changing regulatory requirements and resource shortages, partnerships with solution providers are a foundational means of managing vastly expanding workloads and resource constraints. New Century Software continues to invest in both software solutions and consultants that will ensure the continued success of our clients,” says LaMont, who joined the New Century Software Team in mid-2013. *“It’s a privilege to serve our clients and lead our team of remarkable and dedicated pipeline professionals, and we look forward to supporting our client’s goals and objectives.”*

New Century Software’s services aid clients in the oil and gas pipeline industry with workflow and efficiency-focused solutions. The Professional Services Team’s expanded offerings include:

- Integrity Management Program and Pipeline Safety Procedural Manuals
- Risk Engineering Services
- Process Workflow Consulting
- Program Implementation and On-site Support
- Mock Audits and Gap Analysis Studies
- Regulatory Audit Support

###
